**END OF THE HALF-SIZE
OUTDOOR KITCHEN ERA
IS OFFICIALLY OVER!**

Designed by BBQ COACH

BBQ COACH

The Era of Half-Size Doors & Drawers Is Officially Over!

For decades, outdoor kitchen components had an unspoken flaw: they were designed around the dimensions of heavy concrete block, not modern steel framing.

Concrete block construction required undersized, miniature cutouts just to fit within rigid block courses. When used in steel frame construction, these old-school components created constant headaches for builders and DIYers alike:

Wasted Island Capacity: Massive dead space trapped behind undersized doors and shallow drawer boxes.

Complicated Framing: Hours lost measuring, cutting, and installing frustrating extra vertical studs and horizontal tracks just to support tiny drop-in boxes.

Compromised Functionality: Grilling tools, propane tanks, and bulk accessories never quite had the clearance they needed.

Built Specifically for Steel Frame Construction

End Zone BBQ Kitchens solves this problem permanently. We engineered an entire lineup of true full-size 304 stainless steel doors, drawers, and combo units proportioned specifically for standard 34 5/8" high steel framing modules.

Designed by Willie "The BBQ Coach"—the pioneer who invented DIY outdoor kitchen frame kits back in 1998—these components eliminate the guesswork and compromise from outdoor kitchen builds.

Real Structural Steel Islands in Minutes

No complex layout geometry. No wasted interior volume. Just clean, commercial-grade engineering built for real-world contractors and homeowners:

Heavy-Duty 18-Gauge G60 Steel Frames: Assembled using precision welded corner connectors that simply screw together in minutes.

True Slide-In Integration: Full-size 304-grade stainless steel components slide directly into the modular frame openings with seamless, zero-hassle alignment.

Rock-Solid Strength: In minutes, you achieve a commercial-grade structural steel frame fully prepped to carry the heaviest concrete, GFRC, or granite countertops of your choice.

Build faster. Eliminate dead space. Give every outdoor kitchen the full-size storage and strength it deserves.

Why are BBQ Doors & Drawers so Small and not like my inside kitchen?

Because they were designed for concrete block not Steel Frames

Upgrade to End Zone Full Size Doors & Drawers!

End Zone BBQ Components Just Slide into the frames No More Tricky Cutouts

- Use our 18 Gauge G60 Module Frame kits based on the BBQ Coach DIY Frame Kit System . (sold separate)
- Or build your own frame with track and studs or 1" aluminum or steel square tubes.

End Zone 18" Door & Drawer Combo part # EZ-DDC18

Maximize every inch of your outdoor kitchen with our best-selling storage solution. Engineered from commercial-grade 304 stainless steel, this compact 18-inch combo delivers heavy-duty weather resistance and high-end utility in a space-saving footprint.

The fully enclosed cabinet keeps dry goods, tools, and grill accessories clean and protected from the elements. Enjoy smooth, silent operation with premium soft-close drawer slides, while the interior door compartment features a removable shelf to easily accommodate taller items like bulk cleaning supplies. Big on organization, built to last, and exceptional in value —it's the ultimate upgrade for streamlined island storage.

- **Material:** Commercial-grade 304 stainless steel
- **Width:** Compact 18" profile
- **Enclosure:** Fully enclosed cabinet box for all-weather protection
- **Hardware:** Premium soft-close drawer glides
- **Flexibility:** Removable interior shelf for custom configurations

Premium 304 Stainless Steel Access Doors

Built Tough. Engineered Full-Size. Designed for Steel Frames.

Upgrade your outdoor island with commercial-grade craftsmanship built to endure every season. **End Zone BBQ Kitchens Access Doors** are engineered from 100% heavy-duty **304-grade stainless steel**, delivering superior rust resistance, exceptional durability, and a sleek, modern finish that elevates any backyard build.

Featuring rigid **double-wall construction**, each door panel is built with structural rigidity that feels solid every time you open and close it—eliminating the flimsy, hollow flex found in economy doors. **Concealed, hidden hinges** preserve clean architectural exterior lines, while **heavy-duty magnetic latches** provide a secure, tight seal that stays firmly shut in high winds. Finished with **ergonomic rounded stainless handles**, our doors combine rugged outdoor durability with clean, modern elegance.

Key Features & Advantages

- ✓ **Commercial-Grade 304 Stainless Steel:** Maximum protection against rust, corrosion, heat, and outdoor elements.
- ✓ **Rigid Double-Wall Panel Construction:** Enhanced strength, sound dampening, and a solid feel.
- ✓ **Hidden Flush Hinges:** Concealed internal hardware for a seamless, professional face.
- ✓ **Super-Strong Magnetic Latches:** High-strength magnets keep doors firmly secured against the frame.
- ✓ **Modern Rounded Handles:** Ergonomic, heavy-duty stainless steel pulls for effortless operation.
- ✓ **Slide-In Ready:** Pre-drilled mounting flanges designed for rapid installation into End Zone 18-gauge steel frame modules.

Take Your Outdoor Kitchen to the Next Level with End Zone BBQ Kitchen Drawers

Get the ultimate organization and convenience for your outdoor cooking space with End Zone BBQ Kitchen Drawers. Designed for durability and functionality, these drawers are the perfect addition to any outdoor kitchen, especially those with steel frames.

Sleek and Seamless Design

Featuring a flush exterior with no rivets sticking out, End Zone BBQ Kitchen Drawers offer a clean, seamless look that complements any outdoor décor. Their flush design makes them ideal for integration into steel frames, providing a professional and polished appearance.

Premium Materials and Construction

Crafted from high-quality 304 grade stainless steel, these drawers are built to withstand the elements and provide years of reliable service. The heavy-duty construction ensures they can handle the demands of outdoor cooking and entertaining.

Soft Close Drawers for a Quiet and Gentle Closure

Enjoy a quiet and gentle closure with the soft-close feature on all End Zone BBQ Kitchen Drawers. This mechanism prevents slamming, protecting your drawers and their contents while providing a luxurious touch.

Beautiful Rounded Handles for Style and Comfort

The drawers feature beautiful rounded handles that add a touch of sophistication to your outdoor kitchen. Their ergonomic design provides a comfortable grip, making it easy to open and close the drawers even with gloved hands.

Perfect Fit for Steel Frames

With a height of 34 5/8", End Zone BBQ Kitchen Drawers are designed to fit perfectly into steel frames, simplifying the installation process and ensuring a precise and secure fit. This perfect fit eliminates the need for any cutting or modifications, making it easy to create the outdoor kitchen of your dreams.

Full Size Storage for Your Outdoor Kitchen

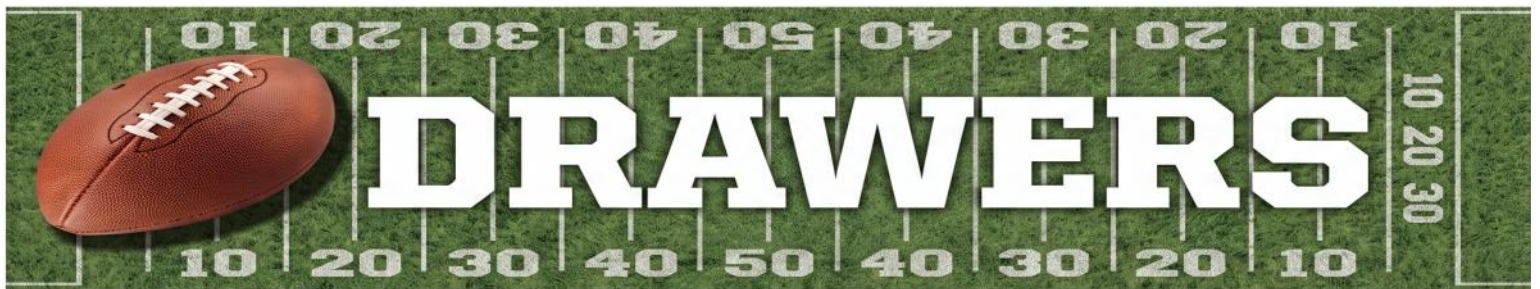

Now you can enjoy full-size storage in your outdoor kitchen, just like your indoor one. End Zone BBQ Kitchen Drawers provide ample space for storing your grilling essentials, utensils, and other outdoor cooking accessories, keeping everything organized and within reach.

Highlighting Our 30" Kamado Single Drawer

For Kamado smoker enthusiasts, the 30" Kamado Single Drawer is a game-changer. It fits perfectly under Kamado smokers, providing convenient storage for charcoal, wood chips, and other smoking supplies. This drawer is designed to maximize the functionality of your Kamado smoker, allowing you to focus on creating delicious smoked dishes.

Elevate Your Outdoor Cooking Experience

With End Zone BBQ Kitchen Drawers, you can create a truly functional and stylish outdoor kitchen that enhances your outdoor cooking and entertaining experience. Order your drawers today and enjoy the convenience, durability, and beauty of premium outdoor kitchen storage.

Smarter Storage for Steel Frame Outdoor Kitchens

Maximize every square inch of your outdoor kitchen with storage solutions engineered specifically for steel framing. Most outdoor islands waste massive amounts of vertical space behind access doors and inside cabinet cavities. End Zone BBQ Kitchens solves that with the industry's first **dedicated open shelf cabinet for steel frames**, alongside our versatile **interior DIY shelf kits**—all crafted from premium **304-grade stainless steel** to withstand the elements without rusting.

The Industry's First Open Shelf Cabinet for Steel Frames

Engineered to integrate seamlessly with standard steel framing systems, our open shelf cabinet delivers immediate, grab-and-go access to your most frequently used grilling tools, wood pellets, cast iron, and prep trays.

- **Purpose-Built Integration:** Designed specifically to slide into steel frame cutouts without awkward shimming or custom framing workarounds.
- **Commercial-Grade 304 Stainless Steel:** Non-corrosive, weather-resistant, and built to match high-end built-in grills and components.
- **Clean Modern Aesthetic:** Creates an attractive visual break in long runs of solid doors and drawers, putting your outdoor setup on display.

New DIY Interior Shelf Kits (18" & 36" Sizes)

Don't let empty cabinet cavities go to waste. Our new DIY shelf kits allow you to add rock-solid shelving behind your access doors in minutes.

- **Heavy-Duty Interior Mounting Rails:** The mounting rails attach directly to the inside vertical studs of your steel frame for rigid, rattle-free support.
- **Two Standard Sizes:** Available in **18-inch** and **36-inch** widths to fit standard single and double door frame openings.
- **Removable Shelves:** Need to store a tall propane tank, a deep stockpot, or access plumbing and gas shutoffs? The shelves lift out easily without requiring tools or teardown.
- **Instant Usable Space:** Adding just one or two shelves behind your access doors doubles or triples your functional storage—keeping seasonings, cleaning supplies, and grill grates organized and off the ground.

End Zone 20" Open Shelf Cabinet

For years, hundreds of DIY builders and contractors have asked BBQ Coach how to cleanly frame open shelving into outdoor kitchen islands. The solution is finally here.

The **End Zone 20" Open Shelf Cabinet** is the industry's first commercial-grade, 304 stainless steel open storage insert engineered specifically for steel-framed outdoor kitchens. Designed from the ground up for seamless framing integration, it features an ultra-clean, flush exterior with **zero protruding rivet heads**—allowing it to slide tight against your steel studs for effortless, gap-free installation.

Inside, two heavy-duty removable stainless steel shelves give you the versatility to organize grilling tools, wood chips, cast iron, or serving trays exactly how you want them. Built to withstand all-weather outdoor environments while delivering a sleek, architectural finish, it eliminates the guesswork of custom framing and brings professional functionality straight into your build.

- **Premium Material:** Heavy-duty 304-grade stainless steel engineered for lifetime outdoor durability.
- **Frame-Ready Engineering:** Completely flush outer casing with no exposed rivets for seamless mounting against steel studs.
- **Customizable Storage:** Includes 2 rigid, removable 304 stainless steel shelves.
- **Pro-Built Aesthetic:** Delivers a modern open-shelf display that matches high-end outdoor cooking suites

End Zone Module Frames: The Ultimate Heavy-Duty Outdoor Kitchen Solution

Build the outdoor kitchen of your dreams faster, stronger, and built to last a lifetime with **End Zone Module Frames**. Engineered for unmatched structural integrity and precision, these heavy-duty frames eliminate the guesswork and labor-intensive cuts required by traditional framing methods.

Constructed from **heavy-duty 18-gauge structural steel** with a protective **G60 galvanization coating**, these frames provide maximum corrosion resistance and the immense load-bearing strength needed to easily support premium **granite and concrete slab countertops**.

Joined by precision pre-welded steel couplers and 1-inch steel square tubing, every module aligns square and true right out of the box. Assembly takes only minutes—simply screw the frame together and slide your End Zone components straight into place without tricky field cuts, extra framing, or specialty tools.

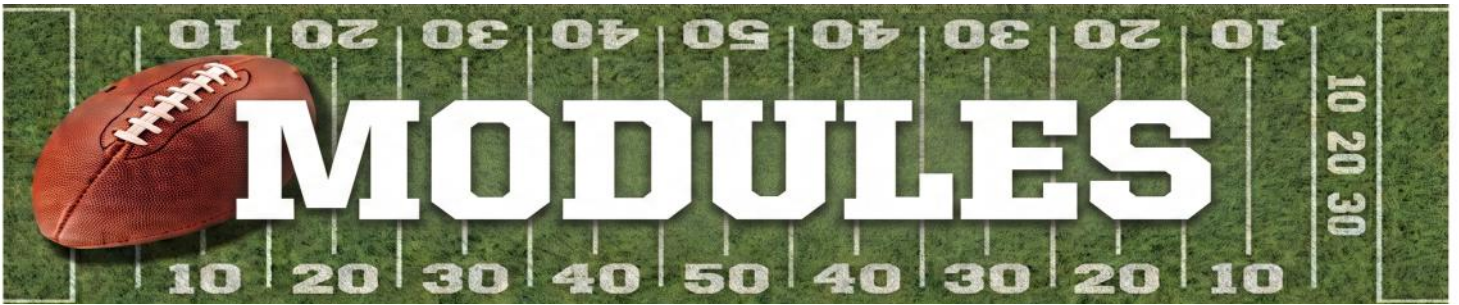

Versatile Layouts & Modular Options

- **Component-Ready Modules:** Perfectly sized to drop your End Zone appliances, access doors, and storage units right in.
- **4-Foot & 8-Foot Utility Modules:** Ideal for extending prep space and creating long island runs. Simply position a vertical tube or stud on the left and right sides of your End Zone components to lock them firmly into your desired location.
- **Corner & Custom Layouts:** Maximize your outdoor footprint with seamless L-shape and U-shape designs using our **90-Degree Corner Modules**, **Diagonal Corner Modules**, or our flexible **Custom Angle Kits**.
- **Raised Bar Counter Kits:** Upgrade your outdoor entertainment space effortlessly with welded bar-back frame kits designed specifically to support high-top seating and heavy elevated countertops.

Specifications & Key Features

- **Structural Integrity:** Heavy-duty 18-gauge structural steel tubing (1" square tube profile).
- **Corrosion Protection:** Premium G60 galvanized coating engineered to withstand extreme outdoor weather and moisture.
- **High Load Capacity:** Rigid structural engineering designed to support heavy concrete slab and granite countertops without sagging.
- **Fast, Accurate Assembly:** Precision slip-fit pre-welded steel couplers—screws together in minutes.
- **Component-Ready:** Engineered for seamless integration with End Zone outdoor kitchen components with zero tricky cuts.
- **Module Frame Depth:** 25"

Please Note: *Modules include the structural steel framing and connection couplers only. Screws/fasteners, cement board, finishing materials (stucco, stone, tile), countertops, air vents, and actual cooking appliances or storage components are sold separately.*

Step up to the ultimate championship-level performance in your outdoor living space with the **All Pro-32 Gas Built-In Grill by End Zone BBQ Kitchens**. Engineered to be the undisputed MVP of your backyard lineup, this fully loaded 32-inch powerhouse combines commercial-grade durability with professional game-day features to ensure every cook is a winning drive.

Key Performance Specs & Features

- **304 Grade Stainless Steel Construction:** Built to withstand the elements with heavy-duty, weather-resistant stainless steel from top to bottom.
- **Game-Day Safety Control Knobs:** Precision heavy-duty control knobs illuminate with cool **blue lights** for standard operation, and instantly shift to **red** the moment the gas is turned on as an intuitive safety indicator.
- **Championship Rotisserie System:** Complete with an integrated infrared back burner, giving you the high-intensity rear heat needed for restaurant-quality roasting, roasting poultry, and succulent spit-fired meals.
- **Heavy-Duty Gridiron Grates:** Thick, robust cooking grates engineered to lock in heat and deliver professional sear marks across the expansive cooking surface.
- **Night Games Interior Lighting:** Dual internal halogen lights illuminate the cooking surface so you can keep grilling long after the sun goes down.

Equip your outdoor kitchen with the **All Pro-32** and take complete command of your next backyard family feast.

Control knobs turns red when gas is on

End Zone BBQ Special Teams Double Side burner Pro
part # EZ-DSB-LP

Assembly Overview

1. Assemble Module Frames with self tapping screws. Adjust leveling feet as needed.
2. Connect modules together with 4 connector plates per union of 2 modules
3. If building with 8 ft modules or track and studs now install right and left vertical studs or steel tubes for each component.
4. Add shelf kits as needed. Note shelf kits work best with 18" and 36" modules. If you are building an 8ft module you will need to add horizontal ctt's to hold the shelf rails across.
5. Run electrical lines as needed
6. Install counter tops, cement board or stainless steel panels.
7. Make sure to add air vents for safety.
8. Finish siding and install appliances.
